
Plan Overview

A Data Management Plan created using DMPonline

Title: Mutual neutralization experiments with atomic and small molecular ions

Creator: Henning Schmidt

Principal Investigator: Henning Schmidt

Data Manager: Henning Schmidt

Project Administrator: Henning Schmidt

Affiliation: Stockholm University

Funder: Swedish Research Council

Template: SU-VR template

ORCID iD: 0000-0002-8209-5095

Project abstract:

Mutual neutralization is the process in which two singly charged atomic or molecular ions—one positive and one negative—interact and form two neutral particles by charge exchange. Mutual neutralization is of interest as a fundamental charge-recombination mechanism, and it takes place in a variety of both naturally occurring and man-made plasma. As a fundamental process, mutual neutralization has been studied experimentally for several decades, but only very recently have experiments been realized, which are capable of determining the final quantum states in which the neutral particles are formed. Such experiments are extremely challenging and an absolute necessity to test and validate theory. With stored ion beams in DESIREE, we reach control of the initial states as well, by natural decays or by laser manipulation, to study mutual neutralization processes in unprecedented detail. An experimental main aspect of the work proposed here is an active control of the initial quantum states by laser manipulation. One of the applications, on which we focus in the present project, is mutual neutralization between hydrogen anions and positive ions in stellar atmospheres: The quantitative determinations of element abundances from observations relies on stellar atmosphere models where mutual neutralization is important, but where experimental data is badly needed.

The above plan creator(s) have agreed that others may use as much of the text of this plan as they would like in their own plans, and customise it as necessary. You do not need to credit the creator(s) as the source of the language used, but using any of the plan's text does not imply that the creator(s) endorse, or have any relationship to, your project or proposal

Mutual neutralization experiments with atomic and small molecular ions

0: Note on personal data!

Q1: I have read and understood the above declaration and hereby certify that this DMP contains no personal data except for information about project members such as PI and contact person.

- Yes

I: Description of data - reuse of existing data and/or production of new data

Q1: Data Quality Assurance measures (FAIR data): please check multiple options that will apply to assure quality and integrity of data collected, created or reused.

- 4. Proprietary file formats (.doc ; .xls)
- 3. Software specific file formats (e.g. Matlab - .mat; Stata - .dta)
- 2. Sustainable file formats (e.g. .pdf; .csv; .txt)
- 1. Non-proprietary file formats (e.g. .csv, .txt, .json, netCDF)

Q2: Dataset ID: at this initial planning stage, please find one main identifier (e.g. a DOI, Handle, URL, ...) for the entire dataset(s) in the project where possible, even if it comprises several data files of different types.

<https://zenodo.org/communities/desiree-infrastructure/>

Q3: Dataset Identifier Type of your Dataset ID above in Q2, please check the corresponding option in the list below!

- url

Q4: Dataset Description (Abstract) - please describe the dataset(s) in the project! The description can be at a rather simple conceptual level, which does not have to point to individual data files.

The data sets in the Zenodo folder contain the limited necessary information to reproduce data representations in published articles.

Q5: Title of dataset

<https://zenodo.org/communities/desiree-infrastructure/>

Q6: Are you re-using datasets that already have a definite distribution (identifier, access point or location, title ...)

- no

Q10: Type of dataset(s) / resource type of the main dataset(s) of the project described by answers to Q2 / Q5 (thus, not primarily of re-used datasets).

- other

Primarily tables containing histograms (time-resolved data from neutral particle and fragment detectors) and correlated detection events from merged beam experiments. These will either be in ascii tables, e.g. csv-files, or in open hierarchical data structures.

Q11: Issue date (YYYY-MM-DD) of dataset in Q2 / Q5.

2025-01-01

II: Documentation and data quality

Q1: How will metadata be created for your dataset? If by use of a repository (recommended), please specify which, either from the given options, or - if Other - by giving a link(s) / URL(s) [if multiple separated by commas] as Additional Information below. Please, do not write whole texts herewith line or paragraph breaks, as this prevents automatic processing and evaluation of the DMP!

- 5. GitHub
- 9. Manually (not recommended)
- 4. Zenodo/StockholmUniversityLibrary

Q2: Which metadata standards and vocabularies will you employ for general and domain specific metadata? (Multiple options possible. Some of them may overlap, then it is unnecessary to check all that hold a particular vocabulary specified in the text field.)

- 1. Metadata from II:Q1

Q3: Which of the following data quality documentation and safeguard measures, if any, would you consider applying to your dataset? (Multiple options possible. For options 4. Pre-registration, 6. Supplementary documentation or 9. Other, please specify to the extent possible in the comment area, e.g. by giving the URLs of particular services you intend to use for certain data quality measures.)

- 7. Validation of data input
- 5. Repeated measurements
- 3. Integrity check of data files
- 2. File format and software description

III: Storage and backup

Q1: Where will you store and backup your data during the project? (Multiple options possible.)

- 6. Repository in II:Q1
- 5. "Cloud server" (please specify)
- 3. Own harddrive

In addition to Zenodo page, data will be stored locally on lab computers and the Physics Department's data storage system (<https://nextcloud.fysik.su.se>).

Q2: What volume (X) of data will you need to store and backup?

- 1 TB < X < 10 TB

Q3: What security measures will you need to employ to protect your data during the research process? (Multiple options can be selected).

- 6. Other (please specify)
- 4. Private links
- 1. Password protection

Neither internal nor external users have the privilege to modify or delete raw data stored in the local data storage system.

IV: Legal and ethical aspects

Q1: Will the creation, collection or reuse of dataset(s) in your project entail processing of *personal data*, i.e. any information relating to an identified or identifiable natural person (a '*data subject*'; that is a *living person*)?

- no

Q2: Will the creation, collection or reuse of dataset(s) in your project entail any of the following:

- (a) processing of *special categories of personal data* according to the General Data Protection Regulation (EU 2016/679), i.e. personal data revealing racial or ethnic origin, political opinions, religious or philosophical beliefs, or trade union membership, and the processing of genetic data, biometric data for the purpose of uniquely identifying a natural person, data concerning health or data concerning a natural person's sex life or sexual orientation
- (b) processing of personal data regarding violations of law that include crimes, judgments in criminal cases, penal law sanctions, or administrative deprivation of liberty
- (c) physical interventions on research subjects or deceased persons
- (d) methods with the purpose of affecting a research person physically or mentally, or which includes an apparent risk of injuring the research subject either physically or mentally
- (e) studies of biological material that has been taken from a living or deceased person, and can be traced to that person

Or, further, will the creation, collection or reuse of dataset(s) in your project include:

- (F) Data from [animal research](#)
- (G) Data on genetic resources and/or traditional knowledge associated with genetic resources
- (H) Data that can be used for military purposes or concerning products that can be used for military purposes
- (I) Data that are sensitive in some other respect

(Possible ethical review documentation applying to any of points (a-e) will be asked for separately.) If you answer yes to any of the points (F-I) and there is already relevant documentation or applications, please provide (a) reference(s) to any application(s)/ approval(s)/decision(s)/document(s), if possible by URL(s) / PID(s) such as DOI(s) giving direct access, or registration no. (Swe. *diariennr.*) in the text field below.

- no

Q5: Intellectual Property Rights -License(s) of data. Please select the usage license(s) for dataset(s) and/ or software produced in your project (Multiple options possible. If *Other*, please specify by a URI or other file location for each of the additional license(s), separated by commas, in the comment area.)

[For *previously existing datasets* that you will be *re-using*, corresponding license(s) are entered in section **!Q9 Description of data - re-use ..**]

If you choose the option *No license*, being aware that it *might* make your dataset less FAIR, please state the reason for this choice. [There are *fully legitimate reasons*, concerning e.g. personal data and sensitive data, that cannot be shared.]

- 01. CC-BY-4.0

Published data will be made accessible with a Creative Commons 4.0 license. No personal or other sensitive information is present in the collected data.

V: Accessibility and long-term storage

Q1: Where will datasets, documentation and/or metadata be made accessible? (Means or location of distribution).

- 2. Supplement to journal article / publication
- 3. SU Archive
- 1. Repository in answer to II:Q1

All data should be made available on repository. Data may also be made available as supplemental material in publications, depending on the journal's requirements.

Q2: What will be made directly accessible (e.g. via repository in Q1, or as supplement to online journal)?

- Metadata and some datafiles

Any data files relevant to a given research study will be made available at time of publication. Test measurements that do not impact the primary measurements may be excluded, as will data that cannot be readily transferred from proprietary internal formats to openly accessible formats. The latter will not have an impact on the usefulness of the data, but are available upon request.

Q3: When will data files and/ or metadata and documentation be made accessible?

- Only after publication of journal article / paper

Data should be made available in connection to publication. Ideally the data will be made available when a manuscript is submitted and contain a reference to the data repository.

Q4: How will you ensure that all data files, documentation and metadata are transferred to SU digital archive for long-term preservation?

- Automatic harvest & transfer from repository

Q5: Will specific systems, software, source code or other types of services be necessary in order to understand, partake of or re-use / analyse data in the long term?

- no

Q6: Will the software you will use to collect, create, handle, transform, refine or analyse data also be needed to replicate or rerun experiments, partake of your datasets or open datafiles?

- no

Q7: Will the software / code you will use to collect, create, handle, transform, refine or analyse data be ... (multiple options possible)

- 2. Proprietary/Commercial (e.g. Matlab, Stata)
- 1. Non-proprietary/Open Source (e.g. Python, R, XSLT)

Data collection is primarily handled with LabView modules. Data analysis primarily with Python scripts.

Q8: Will you be using Software in the "cloud" / Software-as-a-Service (SaaS) to create, handle, transform, refine or analyse data ?

- No

VI: Responsibility and resources

Q1: Who is responsible for data management and (possibly) supports the work with this while the research project is in progress?

- 1. PI

Q2: What resources will be required for data management to ensure that data fulfil the FAIR principles? (Multiple options possible.)

- 3. Repository account(s)

Q3: Please estimate total extra costs (C) for data management, that is not covered by grant funding (or regular SU services, such as RDM-team support).

- < 10000 SEK

VII: Funding requirement fulfilled for initial version

Q1: I hereby certify that the prefect / responsible head of department or institute has (re)viewed this initial DMP as fulfilling the requirements for funding. I am aware that answering Yes will send this Initial version of the DMP to Archive for long-term preservation, and that future editing will then be in Phase 2, the final version.

- Yes

VIII: DMP administrative information

Q1: Please give an Identifier of the Contact Person designated in Project details (even if same as PI), -not the name of the contact person, but only the identifier-string (that is within the " " in the examples below).

0000-0002-8209-5095

Q2: Please select Type of Identifier given as answer to Q1 above.

- orcid

Q3: Affiliation (Department / Institution) of Contact Person. Please select main Department / Institution affiliation *from drop-down menu* (ordered after faculties as in this [list](#)), or else choose "Other" and specify in comment area below!

- Physics

Q4: Language used for this DMP. Please select!

- eng: English

Q5: Funder(s). Multiple choice possible. If Other, please specify funder name(s) in the Additional Information text field, if more than one separated by commas.

- VR - Swedish Research Council

Q6: Grant ID. Please specify, if possible as a URL. (The Grant ID can often be the same as the PROJECT-ID in SweCris, e.g. https://www.vr.se/swecris#/project/2010-00383_VR)

https://www.vr.se/swecris#/project/2022-02822_VR

Q7: Funding status. Please choose one from the dropdown menu.

- granted

IX: Full DMP - additional Datasets and identifiers, Reference list and Project end

Q1: Additional dataset(s)

Please fill in the *Default answer* table below in accordance with the given *Example answer* by replacing *None* in *Title*, *Identifier* and *Type* with *real values* for your dataset(s) after the *T1:*, *Id1:*, *Type1:* etc. You can add / delete rows if needed, but make sure the *new entries* are still in *italics* and leaving the last row without real values with *None* (as this will help us process your DMP data output for review.)

Identifier type: select from the same list as in section I-Q3: *ark*, *doi*, *handle*, *url*, *other*.

If *other*, please specify the type of dataset ID below the table as e.g. "*Local filename*" or "*Project-ID*".

The Description, Type of dataset (software, images, text, spreadsheets, sound, video, other) and Issue date for these additional datasets will as default be the same as for the main dataset described in section I: Q4, Q10 and Q11, so you might have to adjust these answers to fit for all datasets, or specify these new values for each additional dataset (below the table).

Short Title of dataset	Identifier of dataset	Identifier Type
<i>T1: None</i>	<i>Id1: None</i>	<i>Type1: None</i>
<i>T2: None</i>	<i>Id2: None</i>	<i>Type2: None</i>
<i>T3: None</i>	<i>Id3: None</i>	<i>Type3: None</i>
<i>T4: None</i>	<i>Id4: None</i>	<i>Type4: None</i>
<i>T5: None</i>	<i>Id5: None</i>	<i>Type5: None</i>

**Q2: List of References / Sources / Publications (other than reused datasets, in sec. I:Q6-9).
To be updated during all research project.**

References: authors (year): <i>titles</i>	Identifiers / Locations

Q3: Research project ended?

Please indicate if the research project described by this DMP is completed, so the full and final version of this DMP can be sent to long-term archive.

- No
