Plan Overview

A Data Management Plan created using DMPonline

Title: Human Exposure to Antimicrobial resistance Through Water in Africa (Nigeria) as Related to Sanitation

Creator: Ismail Rabiu

Principal Investigator: Prof. Heike Schmitt

Data Manager: Ismail Rabiu

Project Administrator: Ismail Rabiu

Contributor: Prof. Mark C M van Loosdrecht

Affiliation: Delft University of Technology

ORCID iD: 0000-0002-0139-1934

Template: TU Delft Data Management Plan template (2025)

Project abstract:

This study, titled *Human Exposure to Antimicrobial Resistance through Water in Africa (Nigeria) as related to Sanitation*, will investigates how water and sanitation systems contribute to antimicrobial resistance (AMR) exposure in Nigeria.The research aims to examines how the proximity of sanitation systems, such as pit latrines, and the depth of wells influence groundwater contamination. The study also evaluates AMR contamination in surface waters and links these environmental risks to household-level exposure pathways. The study includes conducting **structured interviews** to collect answers to **questionnaires** from locals. In alignment with Nigerian culture, local community leaders will be approached and informed about the research before research participants will be approached.

Households that rely on groundwater sources for drinking water will be recruited from Rural communities in Kano state. Approximately **[100] households/participants** will be involved. Participants will be asked to take part in a structured interview lasting about one hour, where they will answer questions about water use, sanitation practices, and potentvial exposure pathways.

The research is carried out under the umbrella of the GROW project, which recruits individuals with African backgrounds to conduct a PhD at TU Delft. The Main researcher is **Ismail Rabiu**, Nigerian, who now conducts a PhD at TUD under supervision of [Prof Mark van Loosdrecht and Prof Haike Schmitt] (TU Delft) and [Prof Ibrahim Yusuf] (from “KIRCT” a local research institution in Nigeria; A Member of my PhD Advisory Committee as required of GROW scholarship office). I speak Hausa – the local language of Kano state, Nigeria (place where the research is conducted). Further, English is the official language in Nigeria and therefore widely spoken.

Human Exposure to Antimicrobial resistance Through Water in Africa (Nigeria) as Related to Sanitation

0. Adminstrative questions

1. Provide the name of the data management support staff consulted during the preparation of this plan and the date of consultation. Please also mention if you consulted any other support staff.

Sophie Tschirpke: Data Steward at the Faculty of Applied Science. She provided valuable feedback dated, 17/03/2026.

2. Is TU Delft the lead institution for this project?

- Yes, the only institution involved

I. Data/code description and collection or re-use

3. Provide a general description of the types of data/code you will be working with, including any re-used data/code.

Type of data/code	**File format(s)**	**How will data/code be collected/generated?** *For re-used data/code: what are the sources and terms of use?*	**Purpose of processing**	**Storage location**	**Who will have access to the data/code?**
digitized Questionaire data	CSV excel	Questionaires will be handed to participantsas physical copies. They will be digitized into a spreadsheet,. After that, the physical copy will be destroyed.	Required to address the research question	one drive while in Nigeria and moved to Project drive once back at TU Delft	My supervisors: Heike Schmitt, Mark van Loosdrecht and I (Ismail Rabiu)
Personally Identifiable Information	Excel file	Questionnaires	For administrative purposes: obtaining consent and communicating with participants.	one drive while in Nigeria and moved to Project drive once back at TU Delft	My supervisors: Heike Schmitt, Mark van Loosdrecht and I (Ismail Rabiu)
Informed Consent form (scans of physical copies)	pdf	ICF will be handed to participants for signing. After that, a digital copy will be made and the physical form will be destroyed.	to document consent	one drive while in Nigeria and moved to Project drive once back at TU Delft	My supervisors: Heike Schmitt, Mark van Loosdrecht and I (Ismail Rabiu)
Audio recodings of Interviews	.mp3/ mp4	recorded using a mobile device with cloud services turned off or using the TUD laptop. After transcription, the audio file will be deleted.	Required to address the research question	one drive while in Nigeria and moved to Project drive once back at TU Delft	My supervisors: Heike Schmitt, Mark van Loosdrecht and I (Ismail Rabiu)
Transcripts of interviews	pdf	made using MS Teams, or Whisper Transcription software	Required to address the research question	one drive while in Nigeria and moved to Project drive once back at TU Delft	My supervisors: Heike Schmitt, Mark van Loosdrecht and I (Ismail Rabiu)

II. Storage and backup during the research process

4. How much data/code storage will you require during the project lifetime?

- < 250 GB

5. Where will the data/code be stored and backed-up during the project lifetime? (Select all that apply.)

- Project Data Storage (U:) drive at TU Delft
- TU Delft OneDrive

III. Data/code documentation

6. What documentation will accompany data/code? (Select all that apply.)

- Data – Methodology of data collection
- Data – Codebook describing the contents, structure, layout, and variable definitions of the data
- Data – Data dictionary explaining the variables used
- Data – README file or other documentation explaining how data are organised
- Procedure – A description of data processing procedure(s) (such as laboratory setup, simulation workflows).
- Metadata – I will adhere to the metadata standards used by the data repository where the data will be shared (see section V)

IV. Legal and ethical requirements, code of conducts

7. Does your research involve human subjects or third-party datasets collected from human participants?

If you are working with a human subject(s), you will need to obtain the HREC approval for your research project.

- Yes – please provide details in the additional information box below

I intend to apply for ethical approval from the Human Research Ethics Committee, but have not yet done so.

8. Will you work with personal data? (This is information about an identified or identifiable natural person, either for research or project administration purposes.)

- Yes

9. Will you work with any other types of confidential or classified data or code as listed below? (Select all that apply and provide additional details below.)

If you are not sure which option to select, ask your Faculty Data Steward for advice.

- No, I will not work with any other types of confidential or classified data/code

10. How will ownership of the data and intellectual property rights to the data be managed?

For projects involving commercially-sensitive research or research involving third parties, seek advice of your Faculty Contract Manager when answering this question.

- This is an internal TUD research project.

11. Which personal data or data from human participants do you work with? (Select all that apply.)

- Names as contact details for administrative purposes
- Gender
- Date of birth and/or age
- Names and/or geolocation information as part of research data
- Telephone number, email addresses and/or other addresses as contact details for administrative purposes
- Proof of consent (such as signed consent materials which contain name and signature)
- Free text fields (for instance, in questionnaires) in which participants could unintentionally share personal data
- Audio recordings

12. Please list the categories of data subjects and their geographical location.

Category of Data Subjects	Description	Geographical Location
Households Residents	Residents in selected communities located near surface water in selected rural communities	Rural areas of Kano state in Nigeria
Traditional Rulers and Community Leaders	Gatekeepers and informants on cultural and sanitation practices	Rural areas Kano state in Nigeria

13. Will you be receiving personal data from or transferring personal data to third parties (groups of individuals or organisations)?

- No

16. What are the legal grounds for personal data processing?

- Informed consent

17. Please describe the informed consent procedure you will follow below.

In Nigerian culture local community leaders should be approached before inviting locals to participate in the study. Locals naturally guide non-locals to their community leaders, and I'm a native in the local language. The community leaders will be informed about the research (Informed Consent Form in the local language) before their community members will be approached.

Prior to data collection, all participants (households) will be provided with a **detailed information sheet** explaining the purpose of the study, the types of data to be collected (including any personal data), potential risks and benefits, confidentiality measures, and their rights as participants.

The consent process will follow these steps:

1. **Verbal and Written Explanation**: The study will be explained to participants in Hausa language for local communities ensuring comprehension regardless of education level
2. **Voluntary Participation**: Participants will be informed that their involvement is entirely voluntary, and they may refuse or withdraw at any point without penalty.
3. **Documentation of Consent**: Literate participants will sign a **written consent form**. For those that cannot read, a **verbal consent** will be recorded in the presence of a witness who will sign on their behalf.
4. **Confidentiality Assurance**: Participants will be assured that their personal information will be anonymized and securely stored. No identifiable data will be made public.
5. **Right to Withdraw**: It will be emphasized that participants can withdraw their data before or during analysis without needing

to give a reason.

Possibility of a language barrier : English is the official language in Nigeria and therefore widely spoken. I also speak Hausa, the local language in Kano (Nigeria).
Local community leaders are likely to speak english, and the possibility that participating households do not have at least one member that speaks english is low. To also account for that, informed consent forms will also be provided in both English and Hausa.

18. Where will you store the physical/digital signed consent forms or other types of proof of consent (such as recording of verbal consent)?

While in Nigeria, digital copies of the informed consent forms will be stored in one drive and moved to Project Data Storage (U:) drive when back at TU Delft. After digitization physical copies of the informed consent forms will be destroyed.

19. Does the processing of the personal data result in a high risk to the data subjects? (Select all that apply.)

If the processing of the personal data results in a high risk to the data subjects, it is required to perform a Data Protection Impact Assessment (DPIA). In order to determine if there is a high risk for the data subjects, please check if any of the options below that are applicable to the processing of the personal data in your research project.

If any category applies, please provide additional information in the box below. Likewise, if you collect other type of potentially sensitive data, or if you have any additional comments, include these in the box below.

If one or more options listed below apply, your project might need a DPIA. Please get in touch with the Privacy team (privacy-tud@tudelft.nl) to get advice as to whether DPIA is necessary.

- None of the above apply

None

23. What will happen with the personal data used in the research after the end of the research project?

- Anonymised or aggregated data will be shared with others

24. For how long will personal research data (including pseudonymised data) be stored?

- Personal data will be deleted at the end of the research project

25. How will your study participants be asked for their consent for data sharing?

- In the informed consent form: participants are informed that their personal data will be anonymised and that the anonymised dataset is shared publicly

V. Data sharing and long term preservation

27. Apart from personal data mentioned in question 23, will any other data be publicly shared?

Please provide a list of data/code you are going to share under 'Additional Information'.

- All other non-personal data/code underlying published articles/reports/theses

29. How will you share research data/code, including those mentioned in question 23?
Select all that apply and provide additional details below.

- All anonymised or aggregated data, and/or all other non-personal data/code will be uploaded to 4TU.ResearchData with public access

30. How much of your data/code will be shared in a research data repository?

- 100 GB - 1 TB

31. When will the data/code be shared?

- As soon as corresponding results (papers, theses, reports) are published

32. Under what licence(s) will the data/code be released?

- CC BY

VI. Data management responsibilities and resources

33. If you leave TU Delft (or are unavailable), who is going to be responsible for the data/code resulting from this project?

My Supervisor, Pro. Heike Schmitt, Principal investigator, EBT, TU Delft.
Email: h.schmitt@tudelft.nl

34. What resources (for example financial and time) will be dedicated to data management and ensuring that data will be FAIR (Findable, Accessible, Interoperable, Re-usable)?

The 4TU. ResearchData is able to archive 1TB of data/code per researcher per year free of charge for all TU Delft researchers. We do not expect to exceed this and therefore there are no additional costs of long term preservation.

35. Which faculty do you belong to?

- Faculty of Applied Sciences (AS)

Faculty of Applied Science, Department of Biotechnology, Environmental biotechnology (EBT) research group.
