Plan Overview

A Data Management Plan created using DMPonline

Title: God and Diversity: Appropriating Abraham Kuyper's Public Theology to Religious Pluralism in Indonesia

Creator: David Kristanto

Principal Investigator: David Kristanto

Data Manager: David Kristanto

Project Administrator: David Kristanto

Affiliation: Vrije Universiteit Amsterdam

Template: VU DMP template 2021 (NWO & ZonMW certified)

ORCID iD: 0000-0002-8422-5738

Project abstract:

Even though religious freedom is constitutionally guaranteed in Indonesia, the condition of religious pluralism in the country is not without problem. The government has been actively defining what is the meaning of religion, differentiating religion and beliefs, and making few religions as official religions of Indonesia. In that context, the freedom of religion seems to be much more limited, especially for the communities of indigenous religions, whose religions are not officialized by the state. Abraham Kuyper might be relevant to this context. How he fought for freedom for all in the 19th century Netherlands could inspire civil rights movements to fight for freedom for all, and some of his thoughts might bear fruitful theological reflections that are applicable in the context of religious pluralism in Indonesia.

Project title

God and Diversity: Appropriating Abraham Kuyper's Public Theology to Religious Pluralism in Indonesia

Project summary

Even though religious freedom is constitutionally guaranteed in Indonesia, the condition of religious pluralism in the country is not without problem. The government has been actively defining what is the meaning of religion, differentiating religion and beliefs, and making few religions as official religions of Indonesia. In that context, the freedom of religion seems to be much more limited, especially for the communities of indigenous religions, whose religions are not officialized by the state. Abraham Kuyper might be relevant to this context. How he fought for freedom for all in the 19th century Netherlands could inspire civil rights movements to fight for freedom for all, and some of his thoughts might bear fruitful theological reflections that are applicable in the context of religious pluralism in Indonesia.

Your contact details

Please provide the following details: David Kristanto
Your role in the project (please refer to the CRediT contributor roles):Data Manager, Principal Investigator
Telephone number: +6281281205853
Email: kristantodavid27@gmail.com
ORCID (LibGuide): 0000-0002-8422-5738
University: Vrije Universiteit Amsterdam
Faculty/Institute: Faculty of Religion and Theology
Department/Research Group: Religious History and Heritage

Please list the other people involved in this project

N/A

Funding organisation & grant number (if applicable)

N/A

Project code (if applicable)

N/A

Consulted data management expert(s)

Name: Jolien Scholten
Email: j2.scholten@vu.nl

University / partner organization: VU Amsterdam
Date of consultation: 07 / 04 / 2022

1. Data description

Will you collect and/or process personal data in this project?

- No

No.

Will you use existing data? If yes, what is their source?

Yes. The major works of Abraham Kuyper that have been translated into English: Abraham Kuyper's Collected Works in Public Theology (12 vols.)
URL: https://abrahamkuyper.com/

Will you collect or produce new data? If yes, please describe how.

Yes. I will collect the data from both primary source (Kuyper's own works) and secondary sources. The new data will be the relevance of those available resources to the context of religious pluralism in Indonesia.

What kinds of outputs will you produce in this project? Please describe these data assets.

Raw data:
Data asset: Abraham Kuyper's Collected Works in Public Theology
Description: digital and printed
Format: via logos application, and printed books

Processed data:
Data asset: MENDELEY
Description: I store all of my notes and footnotes here
Format: digital, pdf

Analyzed data:
Data asset: Study notes, published journal articles, conference proceedings.
Description: Analysis result materials that are related to Kuyper. Some of them are not directly related to the current research project but related to Kuyper's theology in general.
Format: pdf, textual.

Other:
Research documentation: I published theological themes of Kuyper that I found related to my research as journal articles and conference proceedings.
Analysis software: logos.

How much digital data storage will your project require?

- 0 - 50 GB

Will you collect physical data? If yes, please describe these.

No.

Will you take measures to ensure data quality? Please describe these, if applicable.

N/A.

2. Legal and ethical requirements, codes of conduct

What legislation applies to your research project? Please tick the relevant boxes for your project.

- General Data Protection Regulation (GDPR)/ Algemene Verordening Gegevensbescherming (AVG)

None of above is applicable to me.
My research will be based on published theological and historical sources. So I don't need any data protection since all the sources are accessible to anyone.

Do you require approval of an ethical committee for this project? If yes, please indicate which ethical committee and whether you have obtained approval for this project.

- No

Will you work with data for which intellectual property and/ or confidentiality are an issue? If yes, please describe.

- Yes

Since I use only sources that has been published, they are not confidential documents. On the matter of intellectual property, citation should be done appropriately to avoid plagiarism.

Do you plan on generating a marketable product from your research project? if yes, please describe

- No

3. Storage and back-up during the research process

What measures will you take to secure and protect data during the research process? Please describe, for each separate data asset you described for question 1.5, how you will ensure data security, where the data assets are stored & backed up, and who has authorization to access the asset.

Raw data:
Data asset: literature review
Storage: google drive and mendeley's online cloud
Backup: usb stick. I regularly backup the data to my usb stick. Attached documents in email during supervision could also be a backup data to me.
Access: my two supervisors: Prof. Dr. Matthias Smalbrugge and Prof. Dr. George Harinck.
Security measures: username and password for login.

Processed data:
Data asset: Collecting Kuyper's thought related to religious pluralism.
Storage: gdrive and mendeley

Backup: usb stick.
Access: my two supervisors: Prof. Dr. Matthias Smalbrugge and Prof. Dr. George Harinck.
Security measures: username and password for login.

Analyzed data:
Data asset: systematic analysis of Kuyper's thought related to pluralism.
Storage: gdrive and mendeley
Backup: usb stick
Access: my two supervisors: Prof. Dr. Matthias Smalbrugge and Prof. Dr. George Harinck.
Security measures: username and password for login.

Is it necessary to transfer the (physical or digital) data assets to other locations or research partners? If yes, please describe how you secure the file transfer.

- No

4. Data archiving and publishing

Which data assets will be archived and which will be published?

Raw data:
Data asset: summary of my study notes.
Description: digital, usb stick, google drive.
Format: pdf.

Processed data:
Data asset: MENDELEY
Description: this is the source of all my footnotes in the research.
Format: digital, textual, pdf.

Analyzed data:
Data asset: published journal and conference proceedings.
Description: some systematic analysis of Kuyper that might be directly or indirectly related to the current research project.

Where will you archive your data assets?

If it is published, it will be archived in the publisher's repository.
If it is not published, I will keep it in my laptop's drive or google drive, and usb stick. Mendeley's cloud will also store my data.

For how long will the data be available in the archive?

At least 10 years.

Where will you publish your data assets?

theological journals with Open Journal Systems, international conference proceedings. And also university's repository. I might also consider to publish it in dataverse.nl.

How will you ensure your data assets get a persistent identifier (e.g. a DOI-code)?

By publishing it under an open-access system. Open-access journal generally have DOI code.

In case the materials are not published as journals (for instance in repository), I will try to register the DOI code by myself.

Will you register your datasets in an online registry other than PURE? If yes, where?

No.

Are there restrictions to data publishing? If yes, please specify the reasons and list the data assets you do not wish to share publicly.

No.

When will you share the data? If not immediately after completion of the project, please specify the reasons.

Immediately after the project is complete.

Please indicate the license and/ or terms of use under which you share your data.

I will publish my data as an open data so it is accessible to anyone and re-usable with appropriate reference.

5. Documentation

What documentation and metadata will accompany the project?

I will document my dataset in PURE.

What metadata and documentation will accompany the data assets?

Metadata in published open-access theological journals include author, author's institution, abstract, keywords, correspondence e-mail.

What methods, software or hardware are needed to access and use your data?

pdf viewer, internet browser, pc/laptop, in case it is documented in PURE, access to the PURE portal is needed.

6. Data management responsibilities and resources

Who will be responsible for management of the data assets during the project? Please specify their name, position, role in the project, and faculty/ institution/ group.

Name: David Kristanto
Role: PhD student
Telephone number: +6281281205853
Email: kristantodavid27@gmail.com
ORCID (LibGuide): 0000-0002-8422-5738
University: Vrije Universiteit Amsterdam

Faculty/Institute: Faculty of Religion and Theology
Department/Research Group: Religious History and Heritage

Who will be responsible for management of the data assets after completion of the project (e.g. the project lead/ dedicated data manager/ department head)? Please specify their name, position, role in the project, and faculty/ institution/ group.

Name: David Kristanto
Role: PhD student
Telephone number: +6281281205853
Email: kristantodavid27@gmail.com
ORCID (LibGuide): 0000-0002-8422-5738
University: Vrije Universiteit Amsterdam
Faculty/Institute: Faculty of Religion and Theology
Department/Research Group: Religious History and Heritage

For data that are only available upon request, what methods will be used to handle requests for access and how will data be made available to those requesting access?

N/A.

What resources (for example financial and time) will be dedicated to research data management? Please estimate their cost.

N/A.
